

Ahmed Khaled

Software Test Engineer

☎ (+2) 01091835821 ✉ ahmedkhaled5821@gmail.com in LinkedIn 🐙 GitHub

SUMMARY

Ambitious Software Test Engineer, Sound Experience in detecting bugs in a product before its launch, Collaborating with developers on fixes to those problems, Ensuring all products meet the set quality standards, Build and develop automated tests using various specialized tools.

EDUCATION

BSc of Engineering, Computers & Systems Department
Kafr Elsheikh University

2016 – 2021

PROJECTS

Automation Exercise

Dec 2022 – Jan 2023

Web GUI Test Automation Project

- Automate different functionalities of an E-commerce website called “AutomationExercise”
- languages & Frameworks (Java, SHAFT Engine, Selenium Webdriver, TestNG, Maven)
- Project Design (Page Object Model (POM) design pattern, Fluent design approach)

SwagLabs Using Cucumber

Mar 2023 – Mar 2023

Web GUI Test Automation Project

- End To End Test "SwagLabs" website.
- languages & Frameworks (Java, Cucumber,Gherkin, Selenium Webdriver, Junit, Maven)
- Project Design (Page Object Model (POM) design pattern)

My Store

Nov 2021 – Dec 2021

Web GUI Test Automation Project

Automate different functionalities of an E-commerce website called “My Store”
languages & Frameworks (Java, SHAFT Engine, Selenium Webdriver, TestNG, Maven)
Project Design (Page Object Model (POM) design pattern, Fluent design approach)

Para Bank

May 2022 – Jun 2022

Web GUI Test Automation Project

- Automate different functionalities of “Para Bank” Web App
- languages & Frameworks (Java, SHAFT Engine, Selenium Webdriver, TestNG, Maven)
- Project Design (Page Object Model (POM) design pattern, Fluent design approach)

Fake REST API

Dec 2021 – Jan 2022

API Test Automation Project

- “FakeRESTApi” is a Demo Websites Contains 27 API Request Which You Can Use To Perform API Testing.

- languages & Frameworks (Java, SHAFT Engine, RestAssured, TestNG, Maven)
- Project Design (Object Model design pattern)

Rest Assured Practice

Mar 2023 – Mar 2023

API Test Automation Project

Rest Assured Practice Simple Project perform CRUD Operations Get & Post & Put & Delete Using Native RestAssured.

languages & Frameworks (Java, RestAssured, TestNG, Maven)

Restful-booker

Sep 2021 – Oct 2021

API Test Automation Project

- “Restful-booker” is a Create Read Update Delete Web API that comes with authentication features You can use it to perform API Test Automation
- languages & Frameworks (Java, SHAFT Engine, RestAssured, TestNG, Maven)
- Project Design (Object Model design pattern)

TECHNICAL SKILLS

- Good knowledge about ISTQB Foundation level.
- Extensive knowledge about all phases of the SDLC & STLC.
- Static Testing By reviewing software requirements specifications.
- Good Knowledge about Designing & Executing test cases.
- Good Knowledge about Writing Clear Bug Report.
- Familiar with Jira test management tool.
- Basic knowledge about agile concepts and methodologies.
- Good knowledge about API testing “REST API” using Postman.
- Good knowledge about REST-Assured for automating APIs.
- Hands-on using High Level framework such as SHAFT_ENGINE to automate APIs & Web GUI
- Good knowledge about Using selenium Webdriver for automating web GUI.
- Good Knowledge about TestNG framework & Junit.
- Good Knowledge about BDD (behavior driven development) & Cucumber.
- Hands-on Using POM (Page Object Model) Design pattern & Fluent design approach.
- Good Knowledge about OOP (Object-oriented programming).
